## Mobile Concrete Batching Plant up to 120 m<sup>3</sup>/h.

# PHM-120

### Technical data.

- Maximum production: 120 m<sup>3</sup>/h of batched concrete in 3 m<sup>3</sup> cycles.
- Aggregates hoppers capacity: 4x7.5 m<sup>3</sup> extendable to 45 m<sup>3</sup> total.
- Cement silo capacity: 30 t.
- Aggregates weighing machine for 7500 kg.
- Cement weighing machine for 1500 kg.
- Water installation and pressure system.
- Aggregates loading steel wall attached.
- Unified discharge chute into mixer truck.
- Approximate transport weight: 16000 kg.

### General description.

- Designed after our Leblan batching plants. Efficient and reliable for years.
- Standard transport height and width.
- Load wall, cement silos, aggregates hoppers and extended capability hopper walls included.
- Quick to erect and commissioning.
- Flexible, robust and easy to operate.
