Mobile Soil-Cement Plant up to 150 m³/h.

PMGC-150

Technical data.

- Maximum production: 150 m³/h of mixed soil-cement.
- Aggregates hoppers capacity: 18 m³ in 2 compartments.
- Cement silo capacity: 28 t.
- Water tank capacity: 2000 l.
- Continuous weighing cement dosing system.
- Attached steel aggregate loading wall.
- Turning belt conveyor to discharge onto truck or pile.
- Approximate transport weight: 22000 kg.

General description.

- Designed after our Leblan batching plants. Efficient and reliable for years.
- Standard transport height and width.
- Load wall, cement silos, water tank and aggregate hoppers included.
- Easy to transport and install.
- Flexible, robust and easy to operate.
